Subject to the prior approval of the MFSA, when a Sub-Fund has acquired CISs referred to in this point 2.13, the assets of these CISs do not have to be combined for the purposes of the limits laid down in points 2.2 and 2.11.

- 2.14 Investment in CISs referred to in point 1.4 shall not, in aggregate, exceed 30% of the assets of a Sub-Fund.
- 2.15 When a Sub-Fund invests in the units of other CISs that are managed, directly or by delegation, by the Investment Manager or by any other company with which the Investment Manager is linked by common management or control, or by a substantial direct or indirect holding, such entities may not charge subscription, conversion or redemption fees on account of the Sub-Fund's investment in the units of such other CISs.
- 2.16 Where a commission (including a rebated commission) is received by the Investment Manager or an Investment Advisor by virtue of an investment in the units of another CIS, this commission must be paid into the property of the Sub-Fund.

Where a Sub-Fund invests a substantial proportion of its assets in other CISs, the Offering Supplement relating to that Sub-Fund shall disclose the maximum level of the management fees that may be charged both to the Sub-Fund and to the other CISs in which it intends to invest.

Investments to Track an Index

- 2.17 Notwithstanding the limits stated above, a Sub-Fund may invest up to 20% of its assets in shares and/or debt securities issued by the same body where the investment policy of the Sub-Fund is to replicate an index. When the investment objective of a Sub-Fund is to replicate an index this will be stated in the relevant Offering Supplement.

The Index is subject to MFSA approval and will be recognised by the MFSA on the basis of the criteria set out below:

- its composition is sufficiently diversified;
- the index represents an adequate benchmark for the market to which it refers; and
- it is published in an appropriate manner.

- 2.18 Subject to the prior approval of the MFSA, the limit in point 2.17 above may be raised to 35%, where in the opinion of the Investment Manager, this is justified by exceptional market conditions. The investment up to this limit is only permitted for a single issuer.

General Provisions

- 2.19 The Company, or the Investment Manager acting in connection with all the CISs it manages, may not acquire any shares carrying voting rights which would enable it to exercise significant influence over the management of an issuing body.

- 2.20 The Scheme may acquire no more than:

- 2.20.1 10% of the non-voting shares of any single issuing body;

- 2.20.2 10% of debt securities of any single issuing body;
- 2.20.3 25% of the units of any single CIS;
- 2.20.4 10% of the Money Market Instruments of any single issuing body.

The limits laid out in 2.20.2, 2.20.3 and 2.20.4 above may be disregarded at the time of acquisition, if at that time, the gross amount of the debt securities or of the Money Market Instruments, or the net amount of the securities in issue, cannot be calculated.

2.21 Points 2.19 and 2.20 shall not be applicable to:

- 2.21.1 Transferable Securities and Money Market Instruments issued or guaranteed by a Member State or its local authorities;
- 2.21.2 Transferable Securities and Money Market Instruments guaranteed by non-Member States;
- 2.21.3 Transferable Securities and Money Market Instruments issued by public international bodies of which one or more Member States are members;
- 2.21.4 Shares held by a Sub-Fund in the capital of a company incorporated in a non-Member State which invests its assets mainly in securities of issuing bodies having their registered offices in that non-Member State, where under the legislation of that non-Member State such a holding represents the only way in which the Sub-Fund can invest in the securities of issuing bodies of that non-Member State. This waiver is applicable only if in its investment policies, the company from the non-Member State complies with the limits laid down in 2.2 to 2.10, 2.13 to 2.16, 2.19 and 2.20 and provided that where these limits are exceeded points 2.22 and 2.23 below are observed; and
- 2.21.5 Shares held by a Sub-Fund in the capital of subsidiary companies carrying on only the business of management, advice or marketing in the country where the subsidiary is located, in regard to the repurchase of units at unit-holders' request exclusively on their behalf.

2.22 A Sub-Fund need not comply with the investment restrictions herein when exercising subscription rights attaching to Transferable Securities or Money Market Instruments which form part of their assets.

2.23 The MFSAs have agreed that recently authorised Sub-Funds of the Company may derogate from the provisions of points 2.2 to 2.15, 2.17 and 2.18 for six months following the date of their authorisation, provided each Sub-Fund observes the principle of risk spreading.

2.24 A Sub-Fund may not carry out uncovered sales of:

- 2.24.1 Transferable Securities;
- 2.24.2 Money Market Instruments;

2.24.3 Units of CIS; or

2.24.4 FDIs.

Financial Derivative Instruments (FDIs)

2.25 Position exposure to the underlying of FDIs when combined, where relevant, with positions resulting from direct investments, may not exceed the investment limits included in point 2.2 to 2.11. The position exposure shall be calculated using the Commitment Approach as indicated in the MFSA Rules.

2.26 Subject to MFSA's approval, the requirements of point 2.25, shall not apply in the case of index based FDIs provided the underlying index is one which meets with the criteria set out in point 2.17.

Efficient Portfolio Management

2.27 The Company on behalf of a Sub-Fund may employ techniques and instruments relating to Transferable Securities, Money Market Instruments and/or FDIs for efficient portfolio management purposes. Provided that such transactions shall fulfil the following criteria:

2.27.1 they are economically appropriate in that they are realised in a cost-effective way;

2.27.2 they are entered into for one or more of the following specific aims:

- reduction of risk; or
- reduction of cost; or
- generation of additional capital or income for the Company with a level of risk which is consistent with the risk profile of the Company and the risk diversification rules laid down in points 2.2 to 2.11.

Borrowing and Lending Powers

2.28 The Company may only borrow, for the account of a Sub-Fund, up to 10% of the assets of that Sub-Fund provided that such borrowing is on a temporary basis and that the Company's overall risk exposure shall not exceed 210% of its NAV under any circumstances. The assets of such Sub-Fund may be charged as security for any such borrowings.

The Company may acquire foreign currency by means of a back to back loan agreement(s). Foreign currency obtained in this manner is not classified as borrowing for the purposes of the 10% limit mentioned above, provided that the offsetting deposit: (a) is denominated in the Base Currency of the Sub-Fund; and (b) equals or exceeds the value of the foreign currency loan outstanding.

The Company may not borrow for investment purposes.

Without prejudice of the Company to invest in Transferable Securities, the Company may not lend cash, or act as guarantor on behalf of third parties.

Any special borrowing restrictions relating to a Sub-Fund will be formulated by the Directors at the time of the creation of a Sub-Fund. There are no special borrowing restrictions currently in operation.

Leverage

2.29 A Sub-Fund's global exposure relating to FDIs shall not exceed the NAV of that Sub-Fund. The exposure is calculated taking into account:

- the current value of the underlying asset;
- the counterparty risk;
- future market movements; and
- the time available to liquidate positions.

The Company shall use the Value at Risk ('VaR') model or the Commitment Approach for calculation of Global Exposure in order to measure the global exposure and leverage of any Sub-Fund arising out of its FDI positions.

The VaR model to be adopted by the Company for the purposes of assessing a Sub-Fund's global exposure and leverage relating to FDIs shall be based on the following parameters:

- a confidence level of 99%;
- a holding period five (5) business days; and
- a historical observation period of not less than one (1) year (250 business days).

The Company shall also use stress tests in order to measure any potential major depreciation of a Sub-Fund's value as a result of unexpected changes in the relative value parameters. Stress tests will be carried out at least once a month. The Company shall also assess on a regular basis the quality of the VaR model forecasts by means of a comparison between the potential market risk amount calculated by the model and the actual change in the value of the portfolio (back-testing).

The Company's total exposure limit relating to a Sub-Fund of 200% of NAV, may be alternatively assessed on the basis of the Absolute VaR Approach or the Relative VaR Approach.

Absolute VaR Approach – Under the Absolute VaR Approach, the VaR on a Sub-Fund's portfolio should not exceed 10% of the NAV of that Sub-Fund. If the VaR on the Sub-Fund's portfolio is within 10% of the NAV then the global exposure/ leverage limit described above is deemed to be satisfied.

Relative VaR Approach – Under the Relative VaR Approach, the VaR on a Sub-Fund's portfolio should be compared with the VaR of a benchmark or reference portfolio (i.e. a similar portfolio with no FDIs) in the form of an actual benchmark portfolio (such as an index) or a fictitious benchmark portfolio. If the VaR on the Sub-Fund's portfolio is less than twice the VaR on the comparable benchmark portfolio then the global exposure leverage limit described above is deemed to be satisfied.

The calculation of Global Exposure using the Commitment Approach follows the CESR's Guidelines on Risk Measurement and the Calculation of Global Exposure and Counterparty Risk

for UCITS (CESR/10-788). The Offering Supplement relating to a Sub-Fund will specify the approach to be adopted by the Company in the assessment of the global exposure and leverage arising out of the FDI positions of that Sub-Fund.

Breaches of Investment Restrictions

If the limits laid down above are exceeded for reasons beyond the control of the Investment Manager or the Company, or as a result of subscription rights, the Investment Manager or the Company shall take such steps as are necessary to ensure a restoration of compliance, in respect of that Sub-Fund, with such restriction(s) as soon as possible, taking due account of the interests of its Shareholders, but in any event (unless otherwise authorised by the MFSA), within a period of six (6) months from the date when such excess was discovered.

Alterations to the Investment Objectives, Policies and Restrictions

Any changes to the investment objective of any Sub-Fund shall require the consent in writing of the holders of three-fourths (3/4) of the issued Investor Shares of the relevant Sub-Fund, or the sanction of an extraordinary resolution passed at a separate general meeting of the holder of the Investor Shares of such Sub-Fund in terms of the Articles. The change in the investment objectives will only become effective after all redemption requests received linked to the change in the investment objective during such notice period have been satisfied. Any applicable redemption fees shall be waived accordingly.

The Directors may however, at their discretion, alter the investment policies and restrictions as maybe applicable to the Company or to a Sub-Fund, provided that:

- any material alterations to the investment policies and restrictions as may apply to the Company as a whole shall be notified to all Investors of the Company;
- any material alterations to the investment policies and restrictions as may apply to a Sub-Fund shall be notified to the Shareholders holding Investor Shares in the particular Sub-Fund;

within a period of at least five (5) Business Days prior to when the alterations are to come into force.

RISK FACTORS

There are risks associated with investment in the Company and in each of its Sub-Funds. These include risks which are Company specific, that is, they apply in respect of all classes of Shares of the Company and all Sub-Funds in which the investor may wish to invest and arise from the investment strategy which is adopted in relation to the Sub-Fund and from the underlying investments in which it invests. Investment in certain securities and markets may involve a greater degree of risk than is associated with investment in other securities and markets. A prospective investor should carefully review this Offering Memorandum and relevant Offering Supplement relating to a specific Sub-Fund and carefully consider the risks associated with an investment in Investor Shares of the relevant Sub-Fund before deciding to invest.

An Offering Supplement may also supplement the below list of risk factors with additional risks particular to an investment in the relevant Sub-Fund.

The summary below describes in general terms some of the risk factors that need to be considered in connection with an investment in the Company and its Sub-Funds. These risk factors should be regarded as general information and may not be a complete list of all relevant risk factors. It is accordingly recommended that, besides carefully considering the risk factors below, prospective investors also consult their own advisors on any legal, tax and financial issues that are relevant to their specific situation before investing in the Company and its Sub-Funds.

GENERAL RISK OF INVESTING

The assets and liabilities of the Company and its Sub-funds are as a general rule subject to normal market fluctuations and other risks inherent in owning such assets and assuming such liabilities. The value of investments and the income therefrom, and therefore the value of and income from Investor Shares relating to each Sub-fund can go down as well as up and an investor may not get back the amount he invests. Due to the charges which may be payable on the acquisition or disposal or redemption or exchange of shares, an investment in Investor Shares in a particular Sub-Fund should be viewed as medium to long term. An investment in a Sub-Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Risk factors may occur simultaneously and/or may compound each other resulting in an unpredictable effect on the value of the Investor Shares. No assurance can be given as to the effect that any combination of risk factors may have on the value of the Investor Shares.

LACK OF OPERATING HISTORY

The Company is a newly formed collective investment scheme and therefore does not have any established track record, which could be utilised as a basis for evaluating its potential performances.

PRICE VOLATILITY AND MARKET RISK

Price volatility refers to the fact that the values of the underlying securities of the Sub-Funds will fluctuate in response to the activities of specific issuers and/or general market conditions referred to also as market risk. As a result of such market risk, the price of Investor Shares of the Sub-Funds can go down as well as up and investors may not realise the amount of their initial investment.

INTEREST RATE RISK

Interest rate risk refers to fluctuations in the value of the fixed income securities, including corporate and other debt instruments, resulting from changes in interest rates. In general, if interest rates rise, fixed income security prices fall. In addition, interest rate risk tends to increase as the duration of a fixed income security increases.

Interest rate risk includes, but is not limited to:

- the risk that debt obligations will decline in value because of changes in interest rates; and
- the risk that the cost of borrowing by the Company, or by a Sub-Fund, on which interest is payable at a variable rate will increase if the relevant rate of interest moves higher. Conversely, assets which earn interest at a variable rate will suffer a decline in income if the relevant rate of interest declines.

CREDIT RISK

Investors in the Sub-Fund should be aware that such an investment may involve credit risk. Bonds or other debt securities involve credit risk in relation to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities (which may be zero) and any amounts paid on such securities (which may be zero). This may in turn affect the NAV per Investor Share. Where a Sub-Fund provides for a capital protection feature, the functioning of such feature will often be dependent on the due payment of the interest and principal amounts on the bonds or other debts instruments in which the Sub-Fund is invested. One or more Sub-Funds of the Company may be subject to their counterparties risk including the Administrator, the Depositary that might be used. Even if all the counterparties are of high standing, a failure of one of those might create some disruption and eventually might negatively impact the NAV per Investor Share.

CREDIT RATINGS RISK

Credit ratings are assigned by rating agencies. It is important to understand the nature of credit ratings in order to understand the nature of the securities. The level of a credit rating is an indication of the probability that (in the opinion of the rating agency) payments will be made on the relevant bond(s) or other obligation(s) to which the credit rating relates. While credit ratings can be a useful tool for financial

analysis, they are not a guarantee of quality or a guarantee of future performance in relation to the relevant obligations. Ratings assigned to securities by rating agencies may not fully reflect the true risks of an investment. Ratings may also be withdrawn at any time.

FINANCIAL DERIVATIVE INSTRUMENTS (FDIS) RISK

One or more Sub-Funds of the Company may from time to time utilise both exchange-traded and over-the-counter derivatives including, but not limited to futures, forwards, swaps, options and contracts for differences as part of its investment policy. These instruments can be highly volatile and expose investors to a high risk of loss. The low initial margin deposits normally required to establish a position in such instruments permit a high degree of leverage. As a result, depending on the type of instrument, a relatively small movement in the price of a contract may result in a profit or a loss which is high in proportion to the amount of funds actually placed as initial margin and may result in unquantifiable further loss exceeding any margin deposited. In addition, daily limits on price fluctuations and speculative position limits on exchanges may prevent prompt liquidation of positions resulting in potentially greater losses. Transactions in over-the-counter contracts may involve additional risk as there is no exchange market on which to close out an open position. It may be impossible to liquidate an existing position, to assess the value of a position or to assess the exposure to risk.

A Sub-Fund employing over-the-counter derivatives will also be dependent on the willingness of counterparties to enter into off-exchange contracts with it. Failure to identify or delay in identifying such counterparties could limit the ability of that Sub-Fund to carry on its business.

FUTURES CONTRACTS

The low margins normally required in futures trading permit a very high degree of leverage. As a result, a relatively small movement in the price of a futures contract may result in a profit or loss which is high in proportion to the amount of funds actually placed as margin and may result in unquantifiable further loss exceeding any margin deposited.

Futures trading in many contracts on futures exchanges (although generally not in currencies) is subject to daily price fluctuation restrictions, commonly referred to as 'daily limits', which prohibit the execution of futures trades on any given day outside a prescribed price range based on the previous day's closing prices. Daily limits do not limit ultimate losses but may make it costly or impossible for the Investment Manager to liquidate a futures position against which the market is moving. A series of 'limit moves', in which the market price moves the 'daily limit' with little or no trading taking place, could subject a Sub-Fund to major losses.

OPTIONS

Options carry a high degree of risk. The 'gearing' or 'leverage' often obtainable in options trading means that a small deposit or down payment can lead to large losses as well as gains. It also means that a relatively

small movement can lead to a proportionately much larger movement in the value of a Sub-Fund's investment, and this can work against the Sub-Fund as well as for it.

LIQUIDITY RISK

Liquidity risk is the risk that a Sub-Fund will not be able to pay redemption proceeds within the normal time periods described in the Offering Memorandum because of unusual market conditions, an unusually high volume of redemption requests or other reasons. In such circumstances, the Investment Manager may limit the total number of shares to be redeemed on any Dealing Day and may also temporarily suspend determination of the Sub-Fund's NAV together with the sale and repurchase of shares.

Kindly refer to the section entitled 'Subscriptions, Redemptions and Dealing' in this Offering Memorandum, which provides detailed provisions on deferral of redemption arrangements, redemptions in specie, temporary suspension in redemptions and on suspension of redemption requests.

SUB-CUSTODIANS/DELEGATES

The Depositary may appoint sub-custodians and/or delegates to hold assets of a Sub-Fund. The sub-custody networks used by the Depositary (or its sub-custodians and/or delegates) may be extensive, may comprise numerous sub-custodians and may be subject to change from time to time (including on a daily basis) and accordingly it is not practical for the name and registered office or principal place of business details in respect of each such sub-custodian to be disclosed in this Prospectus. As a result, a potential investor will not necessarily know the identity of any such sub-custodians appointed by the Depositary or its sub-custodians and/or delegates or be able to make an assessment of them.

SEGREGATION OF SUB-FUNDS IN A MULTI-FUND STRUCTURE

The Sub-Funds of the Company are segregated as a matter of Maltese law and as such, in Malta, the assets of one Sub-Fund will not be available to satisfy the liabilities of another Sub-Fund. However, it should be noted that the Company is a single legal entity which may operate or have assets held on its behalf or be subject to claims in other jurisdictions which may not necessarily recognise such segregation. There can be no guarantee that the courts of any jurisdiction outside Malta will respect the limitations on liability as set out above.

As at the date of this Offering Memorandum, the Directors are not aware of any such existing or contingent liabilities. The Directors are also unaware of any instances where the treatment of segregated asset under Maltese law has been successfully challenged against the Company and any Sub-Fund, in Malta or in any jurisdiction where the Investor Shares have been distributed.

CONFLICTS OF INTEREST

Actual and potential conflicts of interest may arise from time to time between the interests of the Investment Manager and its principals, the interests of the Administrator and its principals, the interests of the Depository and its principals, the interests of the Investment Advisor and its principals, the interests of the Directors and the interests of the Company, in particular because the case may be that certain Directors of the Company may also be acting as directors or senior officers of the Investment Manager, the Investment Advisor and the Administrator, as well as, because the Investment Manager, the Investment Advisor and the Administrator for a given Sub-Fund may constitute one and the same entity.

Subject always to the regulatory obligations of the Investment Manager, Investment Advisor, Administrator and Depository, each of the Investment Manager, Investment Advisor, Administrator and Depository acting in such role, and the Directors, may undertake activities which may give rise to potential conflicts of interest including but not limited to, financing and banking transactions with the Company and investing and dealing in Investor Shares of the Company (including sales to and purchases from the Company) of the kind included in the Company's assets or the underlying assets to which the investment policy of any Sub-Fund of the Company is linked.

Prospective investors must understand that the Investment Manager's management obligations are not exclusive to any one Sub-Fund. Indeed, the Investment Manager has been, or may be, in the future, appointed to manage not only one or more Sub-Funds pertaining to the Company but also a number of other collective investment schemes. Consequently, the Investment Manager shall devote to the collective investment schemes under its management only as much time as is reasonably necessary in its judgement for it to carry out effectively its respective duties.

Notwithstanding any of the above-mentioned actual or potential conflicts of interest, the Investment Manager, Investment Advisor, Administrator and Depository have substantial incentives and interest to see the Company trade successfully, and in such eventuality, the Investment Manager, the Investment Advisor, Administrator and Depository will not act upon any such conflict of interest to the detriment of the Company and its Shareholders.

PERFORMANCE FEES

Where a Performance Fee is applicable, investors are advised that the increase in the NAV per Investor Share of the relative Sub-Fund, which is used as a basis for the calculation of the Performance Fee, may be comprised of both realized and unrealized gains as at the end of the financial year, and as a result the Performance Fee may be paid on unrealized gains which may subsequently never be realised by the Sub-Fund. Furthermore, the performance fee does not adopt an Equalisation Method in the calculation of the performance fees payable and there may be instances where possible inequities is present in this performance fee method.

The existence of Performance Fee arrangements, especially where no capped amount is imposed, may constitute an incentive for the Investment Manager to take higher risks in the investment management of the Sub-Fund.

EXCHANGE RATE RISK

Currency fluctuations between the Reference Currency of a Sub-Fund, and (i) the investor's currency of reference; and, (ii) the currency of the underlying investments of the Sub-Fund may adversely affect the value of investments and the income derived therefrom. The Company may attempt to reduce this risk through hedging arrangements as stated in the Offering Supplement relating to a relevant Sub-Fund.

HEDGING TRANSACTIONS

The Company may employ various techniques in respect of the Sub-Funds to attempt to reduce a portion of the risks inherent in their respective investment strategies. The ability to achieve the desired effect through a particular technique is dependent upon many factors, including the liquidity of the market at the desired time of execution. Thus substantial risk remains so that such techniques cannot always be implemented or effective in reducing losses. Hedging transactions, including the use of FDIs, which may be used by the Company have risks associated with them, including possible default by the other party to the transaction, illiquidity, a lack of regulation in certain over-the-counter markets and, to the extent that the view of the management of the Company as to certain market movements is incorrect, the risk that the use of hedging transactions could result in losses greater than if they had not been used. The use of currency transactions can result in losses being incurred as a result of a number of factors including the imposition of exchange controls, suspension of settlements, or the inability to deliver or receive specified currency.

CAPITAL EROSION RISK

When an investor redeems part of his/her holding he/she should be aware that these redemptions will be made from the sale of Investor Shares and may result in an erosion of capital.

In addition, deduction of the initial charge (where applicable) means that if an investor withdraws from the investment in the short-term he may not get back the amount he invested. Hence, investment in the Sub-Funds should be regarded as a long term investment.

TAX AND LEGAL RISKS

The tax consequences to the Sub-Fund and Shareholders in the Sub-Fund, the ability of the Sub-Fund as a foreign investor to invest in the markets and to repatriate its assets including any income and profit earned on those assets and other operations of the Sub-Fund are based on existing regulations and are subject to change through legislative, judicial or administrative action in the various jurisdictions in which the Sub-Fund or its service providers operate.

There can be no guarantee that income tax legislation and laws or regulations governing the Sub-Fund's operations and investments will not be changed in a manner that may adversely affect the Sub-Fund.

TEMPORARY SUSPENSION IN REDEMPTIONS AND SUSPENSION IN THE DETERMINATION OF NET ASSET VALUE

The Company reserves the right to suspend the determination of the Net Asset Value of a Sub-Fund and the right of any Shareholder to require redemption of any Investor Share and the issue of Investor Shares. In such cases a Shareholder may be unable to redeem his Investor Shares in a Sub-Fund within the normal timeframes described in this Offering Memorandum. With respect to Listed Investor Shares the Company will continue to determine the NAV of a Sub-Fund and will allow redemptions for such Investor Shares save in exceptional and motivated circumstances.

REPURCHASE OF INVESTOR SHARES

Should the Company has requests for the repurchase of Investor Shares in respect of five per cent or more of the outstanding Investor Shares in any Sub-Fund on any Redemption Day, the Directors may elect to restrict the total number of Investor Shares repurchased to five per cent of the outstanding Investor Shares in such Sub-Fund, as appropriate, in which case all the relevant requests will be scaled down pro rata to the number of Investor Shares requested to be repurchased.

The balance of such Investor Shares will be repurchased on the next Redemption Day. Any part of a repurchase request to which effect is not given by reason of the exercise of this power by the Directors will be treated as if the request had been made in respect of the next Redemption Day and all following Redemption Days, until the original request has been satisfied in full.

MANDATORY REDEMPTION RISK

Shares may not be issued and may be subject to mandatory redemption or transfer by the Company, inter alia: (i) in circumstances where the Company, the Sub-Fund or any Shareholder may suffer a tax, pecuniary, administrative or other disadvantage; or (ii) where Investor Shares are held by any person who is, or has acquired such Investor Shares on behalf of or for the benefit of a person who are not qualified to invest in the Sub-Funds of the Company.

DEPENDENCE ON KEY INDIVIDUALS

The Investment Manager is responsible for the day to day management of the portfolio of the Company and the Sub-Funds. The Company's success depends to a significant extent, upon the relevant persons to properly manage the Company and the Investment Manager's ability in respect of the day to day management of the assets of the Sub-Funds of the Company. To the extent that such activities relate to the operations of the Company, the Company may be adversely affected if the persons responsible for these activities cease to participate in the operation of the Company or of the Investment Manager.

INDEMNITIES

The Company's Directors and Officers, the Investment Manager, the Administrator, Depositary and each of their directors, officers, employees and agents are entitled to be indemnified in certain circumstances. As

a result, there is a risk that the Company's assets will be used to indemnify such persons, companies of their employees or satisfy their liabilities as a result of their activities in relation to the Company or a Sub-Fund.

CONFIDENTIAL INFORMATION

The Investment Manager may, in connection with its other business activities, acquire material non-public confidential information that may restrict the Investment Manager from purchasing assets or selling assets for itself or its clients (including the Company) or otherwise using such information for the benefit of its clients or itself.

LARGE-CAPITALIZATION COMPANIES RISK

As further detailed in the section headed "Investment Objectives" and "Investment Policies", of the relevant Sub-Fund, a Sub-Fund may invest into company having a large market capitalization ("**Large Cap Companies**"). Generally, Large Cap Companies may be less able than smaller capitalization companies to adapt to changing market conditions. Whilst the reference industry of this Large Cap Companies is developing at a fast pace, Large Cap Companies may be more mature and subject to slower growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.

VALUATION OF UNLISTED ASSETS

Valuation of any Investment which is not quoted, listed or normally dealt in on or under the rules of a Regulated Market will be different from other assets as further detailed in the Section in this document entitled 'Valuation of Assets' under the sub-section entitled 'Calculation of Net Asset Value'. Such valuation may be undertaken at different frequencies from the net asset valuation date relating to the Sub-Funds of the Company.

RISK OF INVESTING IN THE UNITED STATES.

As further detailed in the section headed "Investment Policies", of the relevant Sub-Fund, a Sub-Fund may be significantly exposed to issuers incorporated in the U.S.A. As result of such exposure, the investments made by the aforesaid Sub-Fund may be adversely affected by a decrease in imports or exports, changes in trade regulations and/or an economic recession in the United States given its impact on securities listed on U.S. exchanges. Proposed and adopted policy and legislative changes in the United States are changing many aspects of financial and other regulation and may have a significant effect on the U.S. markets generally, as well as on the value of certain securities.

AML AND DATA PROTECTION

ANTI-MONEY LAUNDERING

The Company will fully comply with its obligations under the Prevention of Money Laundering Act (Cap 373 of the Laws of Malta) and regulations issued thereunder. Such obligations include the identification of its customers, the retention of the relevant identification and transaction documentation and the reporting of transactions suspected of involving money laundering to the Financial Intelligence Analysis Unit. In this regard the Company has established appropriate internal procedures to fulfil these obligations.

The Company is required to ensure full compliance with all applicable Maltese and international anti-money laundering (AML) legislation. The specific requirements include, inter alia, the fundamental requirements to Know Your Client, which extends, for any 'non-individual' investor, to the ultimate beneficial owner(s) of the monies invested.

It should be noted that the Company or the Administrator may request further information, in order to satisfy its regulatory obligations.

The completion of the Subscription Form serves as confirmation that the Shareholder understands and agrees to furnish the requested documents. It also represents the first request for such documents. A subscription for Investor Shares in the Company will not be accepted unless and until the Company and/ or the Administrator receives all such documents as may be requested by it in order for the Company to comply with its Know Your Client procedures and its client identification requirements.

It must also be noted that redemption monies cannot be remitted to the Shareholder until all documents requested have been received. Further, please note that it is a regulatory requirement to report suspicious transactions, and any relevant data in this regard may need to be transferred to the relevant regulators.

There is also a requirement to know and verify the source of wealth of the relevant funds, such requirement includes having relevant information relating to the bank and account from which the monies were remitted and also knowing the source from where the wealth is being generated. A further requirement is that such monies invested may only be redeemed to the account of remittance, except in exceptional circumstances where agreed to by the Company or the Administrator.

In fulfilment of the said obligations (and, in the case of the Company, in exercise of its rights as aforesaid), the Administrator of the relevant Sub-Fund processing the relevant applications or requests, the relevant Investment Manager or other entities marketing Investor Shares of the relevant Sub-Fund and other authorised Service Providers of the relevant Sub-Fund (as well as the Company in terms of its abovementioned rights), may require a detailed identification procedure with respect to a prospective investor or Shareholder or pledgee as well as information concerning the origin of the funds. Such identification procedure will include the production of the documentation specified in the respective Subscription Forms, Transfer Registration Forms or Redemptions Forms (as applicable) and, in the case of a pledge of Investor Shares, the documentation which may be required by the Administrator or other person responsible upon the delivery of the notice of pledge to the Company (acting through the Administrator) in terms of law.

Such documents are only by way of example and any of the persons mentioned above may request such additional information and documentation as is considered necessary to verify the identity of an applicant and identify the emanating source of funds and/or to comply with their respective anti-money laundering obligations. Each applicant shall also be required to make such representations as may be required by the Administrator or other persons responsible in connection with anti-money laundering programs.

In the event of delay or failure by the applicant to produce any information and documents required as aforesaid, the Company acting through the Administrator will refuse to accept the respective application or request (and, where applicable, the subscription monies relating thereto) until proper information and documents have been provided and none of the Company, the Directors, the Administrator, the Investment Manager and other authorised Service Providers or marketing intermediaries or entities shall be liable to an applicant, Shareholder or pledgee where an application or request is not processed or Shares are compulsorily redeemed in such circumstances. Investors should note specifically that where redemption proceeds are requested to be remitted to an account which is not in the name of the Investor, the Administrator and the Company reserves the right to request such information as may be reasonably necessary in order to verify the identity of the Investor and the owner of the account to which the redemption proceeds will be paid. The redemption proceeds will not be paid to a third party account if the Investor and/or owner of the account fails to provide such information.

Each applicant acknowledges that the Company, the Directors, the Administrator, the Investment Manager and other authorised Service Providers or marketing intermediaries or entities shall be held harmless against any loss arising as a result of a failure to process his application or request if such information and documentation as has been requested has not been duly provided.

Depending on the circumstances of each application or request, a detailed identification procedure may not be required in terms of applicable prevention of money laundering and funding of terrorism legislation.

Finally, as the aforementioned legislation is subject to change, any additional requirements imposed on the Administrator or any other person responsible by virtue of any such change will be reflected in disclosure requirements made on the applicant.

TAXATION

GENERAL

The following is a general discussion of certain Maltese tax consequences related to the acquisition and ownership of Investor Shares in the Company. It does not purport to be a comprehensive description of all tax considerations which may be relevant to a decision to purchase Investor Shares in the Company, and in particular, does not consider any specific facts or circumstances that may apply to a particular investor. It is based on laws currently in force in Malta and as applied on the date of this Offering Memorandum, which are subject to change, possibly with retroactive effect. Prospective investors of Investor Shares in the Company are advised to consult their own tax advisers as to the tax consequences of the purchase, ownership and disposition of Investor Shares in the Company, including the effect of any taxes, under the tax laws of the Republic of Malta and each country of which they are residents.

THE SUB-FUND

The Sub-Fund qualifies as a non-prescribed fund for tax purposes in terms of Maltese Law. No Malta tax should arise on any profits or gains of the Fund in terms of the Income Tax Act (Chapter 123 of the Laws of Malta). However capital gains, dividends, interest and any other income deriving from one's investment in the Sub-Fund arising outside Malta may be subject to tax in the country of source and such taxes may not be recoverable by the Sub-Fund or the investor.

CAPITAL GAINS TAX ON REDEMPTION OR TRANSFER

Capital gains realized by investors who are non-residents of Malta are not subject to tax in Malta. They may however be subject to tax in their country of incorporation, residence, nationality or domicile.

Maltese residents are subject to capital gains tax on gains made in redeeming or transferring their Investor Shares or on a distribution of capital on the winding down of the Sub-Fund. Such investors may either opt to have final withholding tax at the rate of 15% withheld at source from capital gains realized by them or opt to declare the gain in the income tax return and be thus subjected to rates or tax normally applicable to them on their income.

In case of transfers to third parties, the transferor is obliged to declare any capital gains in the income tax return and pay tax at normal rates. Any capital gains on an eventual redemption will be calculated without reference to any intermediate transfer.

VALUE ADDED TAX

Fees chargeable to the Company may be subject to VAT in accordance with applicable law. If any VAT is charged, this will not be recoverable by the Sub-Fund

INDEMNITIES

The Company has agreed that with respect to any actions in which any of its Directors, Officers, employees and agents is a party, the Company shall indemnify and hold harmless such person against any loss, claim, damage, charge, liability or expense (including reasonable attorneys' and accountants' fees), judgements and amounts paid in settlement, provided such actions did not involve negligence, wilful default or fraud. Expenses may be paid by the Company in advance of the final disposition of such action if the indemnified person agrees to reimburse the Company in the event indemnification is not permitted.

The Company may purchase and maintain insurance in relation to the Directors against any liabilities asserted against them.

In addition, the Company has granted indemnities to the Investment Manager, and their respective directors, officers and employees in respect of actions brought against them in their respective capacities provided that such actions did not involve negligence, wilful default or fraud.

The Company has granted indemnities to the Administrator and the Depositary and their respective directors, officers and employees in respect of actions brought against them in their respective capacities provided that such actions did not involve gross negligence, wilful default or fraud.

ALLOCATION OF ASSETS AND LIABILITIES

The assets and liabilities of each Sub-Fund shall be treated for all intents and purposes of law as a patrimony separate from the assets and liabilities of each other Sub-Fund.

The liabilities incurred in respect of each Sub-Fund shall be paid out of the assets forming part of the patrimony of such Sub-Fund. In the event that the liabilities of a particular Sub-Fund exceed its assets, then the proportion of liabilities in excess of the assets shall not be allocated to the other Sub-Funds and the creditors of that Sub-Fund whose liabilities exceed its assets shall have no claim or right of action against the assets of the other Sub-Funds and the Company.

Without prejudice to the above, the assets and liabilities of each Sub-Fund shall be allocated in the following manner:-

- a) the proceeds from the issue of Shares representing a Sub-Fund shall be applied in the books of the Company to that Sub-Fund, and the assets and liabilities and income and expenditure attributable thereto shall be applied to such Sub-Fund subject to the provisions of this Article;
- b) where any asset is derived from another asset, such derived asset shall be applied in the books of the Company to the same Sub-Fund as the assets from which it was derived and in each valuation of an asset, the increase or diminution in value shall be applied to the relevant Sub-Fund;
- c) where the Company incurs a liability which relates to a particular Sub-Fund or Sub-Funds or to any action taken in connection with a particular Sub-Fund or Sub-Funds, such a liability shall be allocated to the relevant Sub-Fund or Sub-Funds in accordance with the interest of each Sub-Fund or Sub-Funds; provided that all liabilities of the Company irrespective of the Fund to which they are attributable shall be binding upon the Company as a whole; and
- d) where the asset or liability of the Company is commonly owned or jointly incurred for the benefit of more than one Sub-Fund, such asset or liability, shall be allocated to all such Sub-Funds pro rata to the Net Asset Value of each Sub-Fund at the time the attribution is made or at such other time as the Directors may determine.

When issuing a class of Shares in regard to any Sub-Fund, the Directors may allocate any fees payable by an investor in subscribing to or redeeming any of the Shares, Duties and Charges as defined in the Articles, and ongoing expenses on the basis which is different from that which applies in the case of Shares in other classes in the Sub-Fund.

If the directors determine that, notwithstanding the foregoing, the assets or liabilities in respect of any Sub-Fund shall be attributed to one class of Shares on a basis different to that of another class of Shares as may be set out in this Offering Memorandum from time to time, the number of undivided parts in the net assets of the Sub-Fund to which each such Share shall be entitled shall be adjusted in such manner as the Directors shall determine, so as to give effect to the different basis of attribution; provided that in so doing the Directors shall not damage or reduce the participatory rights of existing classes of Shares in the Sub-Fund or the Company as a whole.

VALUATION OF ASSETS

CALCULATION OF NET ASSET VALUE

The Board has delegated the calculation of the Net Asset Value of the Sub-Fund and of Investor Shares in the Sub-Fund to the Administrator.

The Net Asset Value of the Company shall be the value of all the assets less all the liabilities of the Company. The NAV of the Sub-Fund shall be calculated by deducting the Sub-Fund's liabilities from the value of the Sub-Fund's assets. The NAV per Investor Share of each Sub-Fund is calculated by dividing the NAV of the Sub-Fund by the number of Investor Shares in the Sub-Fund.

The NAV of the Sub-Fund and of Investor Shares in the Sub-Fund shall be calculated on each Valuation Day. The NAV of the Sub-Fund may also be determined in such other circumstances as the Board of Directors may from time to time determine.

Where more than one class of Share is in issue in respect of a Sub-Fund, the NAV of the relevant Sub-Fund shall be allocated between each class based on the NAV of the Investor Shares of each class as at the immediately preceding Valuation Day plus any subscriptions and minus any redemptions. Where different entitlements, costs, fees and expenses, (for example, the annual management fee) or liabilities apply in respect of different classes of shares, (including the gains/losses on and costs of financial instruments employed for currency hedging between the Base Currency and a designated currency) these shall be excluded from the initial calculation of the NAV of the Sub-Fund and applied separately to the NAV allocated to the relevant class. The portion of the NAV of each Sub-Fund attributable to each class shall then be divided by the number of Investor Shares of the relevant class in issue at the relevant Valuation Day. The value per Investor Share in each class shall then be converted into the relevant currency of denomination of the class at prevailing exchange rates applied by the Administrator in order to calculate the NAV per Investor Share of the relevant class.

The method of calculating the value of the assets of each Sub-Fund is:-

- a) the value of any Investment quoted, listed or normally dealt in on or under the rules of a Regulated Market shall be calculated by reference to the price appearing to the Directors to be the official closing dealing price or (if offered and redeemed quotations are made) the latest available middle market quotation on such Regulated Market through prices made available by valuation systems independent from issuers (such as Bloomberg and Reuters) provided that:-
 - if an Investment is quoted, listed or normally dealt in on or under the rules of more than one Regulated Market, the Directors shall adopt the price or, as the case may be the middle quotation on the Regulated Market which, in their opinion, provides the principal market for such Investment or through prices made available by independent valuation systems;
 - in the case of any Investment which is quoted, listed or normally dealt in on or under the rules of a Regulated Market but in respect of which, for any reason, prices on that Regulated Market or through independent valuation systems may not be available at any relevant time, the value thereof shall be determined by such professional person (third party valuer) as may be appointed for such purpose by the Directors. Such third party valuer should: be

independent from the Company, its officials or any service providers of the Company; be of good standing with recognised and relevant qualifications; and be an authorised member of a recognised professional body in the jurisdiction of the assets;

- the Directors shall not be under any liability by reason of the fact that a value reasonably believed by them to be the latest available price or, as the case may be, middle quotation for the time being may be found not to be such; and
 - there shall be taken into account interest accrued on interest-bearing Investments up to the date at which the valuation is made unless such interest is included in the price or quotation referred to above.
- b) the value of any Investment which is not quoted, listed or normally dealt in on or under the rules of a Regulated Market shall be the initial value thereof ascertained as hereinafter provided or the value thereof as assessed on the latest revaluation thereof made in accordance with the provisions hereinafter contained.

For this purpose:-

- the initial value of such an Investment shall be the amount expended out of the Fund in the acquisition thereof (including in each case the amount of the stamp duties, commissions and other expenses incurred in the acquisition thereof and the vesting thereof in the Company); and
 - the Directors may at any time cause a revaluation to be made of any such Investment at a fair market value, by such professional person as may be appointed for such purpose by the Directors in consultation with and subject to the approval of the Auditor of the Company provided that any such professional person is independent from the Company, its officials or any service provider to the Company; is of good standing with recognized and relevant qualifications; and is an authorized member of a recognized professional body in the jurisdiction of the assets.
- c) the value of each unit or share in any collective investment scheme which provides for the units or shares therein to be realised at the option of the shareholder out of the assets of that scheme shall be the last published net asset value per unit or share or (if offer and redemption prices are published) at a price midway between the last published offer and redemption prices applicable to the Fund;
- d) cash, deposits and similar property shall be valued at their face value (together with accrued interest);
- e) property other than Investments shall be valued in such manner and at such time or times as the Directors shall from time to time determine. Derivative instruments shall be valued using quoted market prices for publicly traded derivatives, or, in the absence of quoted market prices, appropriate valuation techniques as the Directors shall from time to time determine including where such value shall be the probable realisation value estimated with care and in good faith by the Administrator. Over-the-counter derivative instruments shall be valued as at the settlement price as provided by the counterparty and verified by a competent person which may be the Administrator but must be independent of the counterparty. Forward foreign exchange contracts shall be valued with reference to the prevailing market maker quotations, namely, the price at which a new forward contract of the

same maturity could be undertaken, or, if unavailable, at the settlement price provided by the counterparty;

- f) notwithstanding any of the foregoing sub-paragraphs, the Directors may adjust the value of any Investment or other property or permit some other method of valuation to be used if it considers that in the circumstances (including without limitation a material volume of subscription or redemptions of Shares in the Fund; or the marketability of the investments or other property; or such other circumstances as the Directors deem appropriate) such adjustment or other method of valuation should be adopted to reflect more fairly the value of such Investment or other property;
- g) every Share allotted by the Company shall be deemed to be in issue and the Fund shall be deemed to include the net amount of any cash or other property to be received in respect of each such Share;
- h) where, in consequence of any notice or repurchase request duly given, a reduction of the Fund by the cancellation of Shares has been or is to be effected but payment in respect of such reduction has not been completed, the Shares in question shall be deemed not to be in issue and any amount payable in cash or Investments out of the Fund in pursuance of such reduction shall be deducted;
- i) where any Investment or other property has been agreed to be acquired or realised but such acquisition or disposal has not been completed, such investment or other property shall be included or excluded and the gross acquisition or net disposal consideration excluded or included as the case may require as if such acquisition or disposal had been duly completed;
- j) there shall be included in the assets an amount equal to all such costs, charges, fees and expenses as the Directors may have determined to amortise less the amount thereof which has previously been or is then to be written off;
- k) where an amount in one currency is required to be converted into another currency the Directors may effect such conversion using the latest available rates as the Directors shall determine at the relevant time except where otherwise specifically provided therein;
- l) there shall be deducted from the assets such sum in respect of tax (if any) as in the estimate of the Directors will become payable in respect of the current accounting period;
- m) there shall be deducted from the value of any Investment in respect of which a call option has been written the value of such option calculated by reference to the latest available dealing price on a Regulated Market or (if offered and redeemed quotations are made) middle quotation on such Regulated Market or if no such price is available the value thereof shall be determined by such professional person as may be appointed for such purpose by the Directors;
- n) where the current price of an Investment is quoted, ex dividend or interest, there shall be added to the assets a sum representing the amount of such dividend or interest receivable by the Fund but not yet received;
- o) there shall be added to the assets the amount (if any) available for allocation in respect of the last preceding accounting period but in respect of which no allocation has been made;

- p) there shall be deducted from the assets the total amount (whether actual or estimated by the Directors) of any other liabilities properly payable including outstanding borrowings and accrued interest on borrowings (if any) but excluding liabilities taken into account sub-paragraph (I) above.

Notwithstanding the foregoing, the Directors shall be entitled to value the Shares of any Sub-Fund using the amortised cost method of valuation, in specific instances where the foregoing methods cannot be reliably determined. Under the amortised cost method the Investments of the Company are valued at their cost of acquisition, adjusted for amortisation of premium or accretion of discount on the Investments, rather than at the current market value of the Investments.

The Directors have delegated their function in connection with the determination and calculation of the NAV to the Administrator. In calculating the Net Asset Value, the Administrator shall not be responsible for the accuracy of financial data, opinions or advice furnished to it by the Investment Manager, the Sub-Investment Manager, the Company, the Company's agents and delegates, broker(s), market makers and/or independent third party pricing services, whether reporting to the Company or the Administrator. The Administrator may accept, use and rely on prices provided to it by the Company or its delegates or other independent third party pricing services for the purposes of determining the Net Asset Value and shall not be liable to the Company, any Shareholder or any other Person in so doing by reason of any error in the calculation of the Net Asset Value resulting from any inaccuracy in the information provided by the Company its delegates or other independent third party pricing services or its delegates. The Administrator has not been retained to act as an independent valuation agent, which is acknowledged by the Company. In the event that either: (A) the Administrator is unable to obtain a price from a publicly available pricing source or from third party reports procured for the Administrator by the Company or its delegate, or (B) there is a discrepancy between the price provided by the Company or its delegate and the price obtained by the Administrator, the Administrator shall be entitled to accept the price of the Company or its delegate and the Administrator is entitled to rely on such prices without further verification. In such circumstances the Administrator shall not be liable for any loss suffered by the Company or any Shareholder by reason of any error in the calculation of the Net Asset Value resulting from any inaccuracy in the information provided by the Company or its delegates. The Company has agreed that any prices provided by the Company or its delegates to the Administrator will be determined by the Company or its delegates in accordance with the requirements of the MFSA and this Offering Memorandum.

For the purposes of preparing any valuation in connection with the NAV of the Company, the Board shall be entitled to obtain at the expense of the Company and rely on professional advice.

DETERMINATION OF SUBSCRIPTION AND REDEMPTION PRICES

The initial price per Investor Share in a Sub-Fund during an Initial Offer Period shall be the Initial Offer Price referred to in the Offering Supplement of the relevant Sub-Fund. Thereafter the subscription price per Investor Share on any Subscription Day shall be the NAV of the Investor Share on that Subscription Day as at its Valuation Day.

The redemption price of an Investor Share in a Sub-Fund on any Redemption Day shall be the NAV of the Investor Share on that Redemption Day as at its Valuation Day.

On subscription or redemption, an investor may also need to pay charges referred to under the section entitled 'Fees, Charges and Expenses'.

SUSPENSION OF THE CALCULATION OF THE NET ASSET VALUE AND SUSPENSION OF REDEMPTIONS

The Company at any time may, but shall not be obliged to, temporarily suspend the determination of the NAV of the Shares and the subscription of such Shares, and the redemption of all or part of such Shares for which repurchase requests have been received, in the following instances:-

- a) During any period (other than holiday or customary weekend closings) when any market is closed which is the main market for a significant part of the investments comprised in the Sub-Fund to which such class of Shares relates, or in which trading thereon is restricted or suspended;
- b) During any period when an emergency exists as a result of which disposal by the Company or investments which constitute a substantial portion of the assets of the Sub-Fund to which such class of Shares relates is not practically feasible;
- c) During any period when for any reason the market value of investments of the Sub-Fund to which such class of Shares relates cannot be reasonably, promptly or accurately ascertained by the Company;
- d) During any period when remittance of monies which will, or may be, involved in the realization of, or in the payment for, investments comprised in the Sub-Fund to which such class of Shares relates cannot be carried out at normal rates of exchange;
- e) During any period when the proceeds of sale or repurchase of such Shares in the Company cannot be transmitted to or from the Company's account;
- f) During any period when in the opinion of the Directors the realization of assets of the Sub-Fund to which such class of Shares relates could, if realized at that particular moment in time, adversely affect and prejudice the Shareholders' interest in the Company;
- g) During any period in which any means of communication necessary to determine the price or value of any of the investments do not function or do not function properly;
- h) Upon the publication of a notice convening a general meeting of the Sub-Fund for the purpose of resolving to wind-up the Sub-Fund; or

In the case of subscription only, if the Board of Directors agrees this to be in the best interest of the Sub-Fund.

Notice of any such suspension and notice of the termination of any such suspension shall be given immediately to the relevant financial regulator and shall be notified to all Shareholders if in the opinion of the Administrator it is likely to exceed fourteen (14) days and will be notified to all Shareholders in the Company. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible.
